THE UNITED CHURCH

ST THERESA CATHOLIC CHURCH
IRMA, ALBERTA
Service on the first Sunday of each month at 11 a.m.

Yeggmen Try to Blow Royal Bank Safe at Wainwright Wed.

YEGGS DYNAMITE BANK SAFE
IN WAINWRIGHT, GET NO LOOT

Robbers Gain Entrance to Royal Bank by Using Ladder—Manager's Office Ransacked After Failure with Safe—Revolver Taken.

Yeggmen used three explosive shots on the big safe in the Royal Bank of Canada branch at Wainwright some time Wednesday night and Thursday morning but failed to gain entrance and left the bank without a cent of money.

The strong box resisted the work of the would-be safe-blowers, although the exterior of it is badly damaged. One shot ripped a heavy hinge away; another gouged out the combination lock and a third ripped the handle off. Attempts were made with cutting tools to take off the other hinge but the efforts failed.

Yeggs Used Ladders

Entry to the bank premises was made by the use of ladders stolen from the Alberta government telephone exchange across the road from the bank. One short ladder was tried and another substituted so that the men could reach an upstairs window.

A crowbar was used in getting the window open and the men walked downstairs and into the main part of the premises. Some of the tools were left on the floor when the men gave up the attempt to crack the safe, and these have been identified as being stolen from the Ford garage which was also broken into during the night.

Steal Revolver

The manager's office was ransacked after the unsuccessful attempts at the safe, but the only thing obtained was a revolver.

One fuse, an apparent dud, was left on the floor but none of the explosive material was left about.

Discovery of the attempted robbery was made at 8.00 a.m. when the janitress entered the premises to do the morning cleaning. She in turn notified G. C. Siddal, bank manager, and Sgt. Stewart of the Alberta provincial police is investigating.

The Saturday evening dances are again being run every Saturday evening from 9 to 12 in Kiefer's Hall, Irma. Admission: Gents 55c, Ladies free.

The next meeting of the Ladies Aid will be held Thursday, October 9th at the home of Mrs. Osterhout in town. All ladies are cordially invited.

WEEKLY REVIEW PROV. MARKETS

Markets as Revised by the Market Examiner, of Calgary, For This Paper.

BEEF—Edmonton reports the market showing a decidedly better tone under light receipts. Prices are from 25c to 50c higher. Choice heavy steers made from \$5.25 to \$5.75; choice light \$5.25 to \$5.75; good \$5 to \$5.25; common \$3.50 to \$4.

FEEDERS, STOCKERS—Demand in this market has been fairly active and offerings are turning over at steady prices. Feeder steers making \$4 to \$4.75; stock steers \$3.50 to \$4.50; stock heifers \$3.50 to \$4.50; stock cows from \$2.50 to \$3.75.

HOGS—Edmonton reports that hogs made \$11 on Wednesday, while select sold at \$11.50 and butchers at \$10.65, fed and watered.

SHEEP—Edmonton reports slightly better tone to the market, with yearlings at \$4 to \$4.50; ewes \$2 to \$4, and lambs \$5.50 to \$6.75.

CREAM—Special noon bringing 27¢; first 25¢ to 27¢, and second 22¢ to 24¢, at country points and centralizers.

POULTRY—No. 1 fowl, over 4 lbs. 10c; No. 1 under 4 lbs. 8c; No. 2 5c; roasters 5c, and broilers 12 to 14c.

EGGS—Offerings continue light, while quality on the whole is not very good. Extras finding fair demand, but other grades inclined to be dragging.

Prices steady at extras, 23c; first, 21c; seconds 17c.

HIDES—Receipts from country points light owing to low prevailing prices.

WOOL—Receipts very limited, for bulk of clip has already been marketed. Jobbers quoting 7 to 8c lb.

TOFIELD POSTOFFICE AND STORE ROBBED

On Monday night the local postoffice was entered with the evident idea of robbery. Entrance was obtained through a small window near the ceiling, the lower window having bars. There was nothing of value for the burglar to take as all valuables were locked in the safe and with the exception of trying the combination this was not interfered with. The burglar left in the same manner as he entered, and must have been reasonably small and agile, as the window is high up and small.

The same night Jobb's store was broken into, and again entrance was obtained through a rear window. Nothing the store was taken but the till was cleared of some silver and a few dollars.—Tofield Mercury.

RIMBEY PUBLISHER SUICIDES

James J. Quinn, who launched The Rimbey Record early in July this year, was found dead in the back work room of his printing office at Rimbey at noon on Tuesday, Sept. 23rd. Evidence pointed to the fact that he had taken his own life by shooting. He leaves a wife and grown-up daughter. No cause is advanced for the rash act.

Mr. Quinn edited and published The Forestburg Herald for upwards of a year prior to going to Rimbey in July. Previous to coming to Rimbey he published a paper at Rocanville, Sask., but was forced to give up the work owing to a nervous breakdown.

He was a veteran of the Great War, an exemplary citizen, a hard worker and a deep thinker.

GREENFIELD RESIGNS CANADIAN POST IN LONDON, ENGLAND

Herbert H. Greenfield, Alberta's first U.F.A. premier, has lost his job.

Resignation of Mr. Greenfield from the post of Alberta Agent general at London, to take effect as from January 1st, 1931, was announced on Monday by Premier J. E. Brownlee. Mr. Greenfield will devote himself to private enterprise, and will become affiliated with oil interests backed by powerful British capital.

The Alberta Government is not yet prepared to state what action will be taken with regard to the agent general post in London.

Main Bout Had Sudden Ending

The ten round bout scheduled between Curly Kid of Irma, and K.D. Holland of Drumheller at Wainwright on Tuesday evening lasted about ten seconds. After a lot of time spent wrangling about tapes the two boxers finally squared away. Holland shot a right to Curly's stomach which backed away to the ropes and in following up Holland went to his knees. Curly knocked Holland three or four times with what looked like the rabbit punch when the referee stepped in. Both boxers went to their chairs and sat down. The three judges went into a huddle and spent a half hour trying to decide what had happened. In the meantime the referee worked up and thought that Curly Kid had won by a knockout, even after no count had been made by him. After consulting the rule book and putting and take the judges finally came to the conclusion that Holland had won on a foul.

The preliminaries consisted of a battle royal between five young boys who were blindedfolded and left loose to hit where and whom they may.

Zurch of Edmonton defeated Fergé of Hay Lakes in a three round affair. Nash of Irma, had little difficulty in getting the decision over Robinson of Wainwright in two rounds.

Pete Spring of Irma and Jim Grant of Wainwright, stepped off three rounds with Pete declared the winner. Grant's clever ducking kept Pete from putting over the haymaker.

The redeeming feature was a three round exhibition by the McPhee boys of Drumheller, 11 and 12 years old, who were roundly applauded for their manly actions in the ring.

THANKSGIVING AND ARMISTICE SET FOR NOVEMBER 10th

Ottawa, Ont., Sept. 27.—Following Friday's cabinet meeting it was announced that Thanksgiving Day and Armistice Day this year will be on Monday, November 10th. The usual proclamation declaring the date will appear in the next issue of the Canada Gazette.

SALE AND REDEMPTION OF IMPOUNDED ANIMALS (Sec. 48)

Under the Domestic Animals Act, (Municipalities)

Notice is hereby given under Section 48 of The Domestic Animals Act (Municipalities) that—

Bay Mare and Buckskin C.H. branded M left jaw, was impounded in the pound kept by O. Croteau, located on the N.E. 24-45-7 with on Thursday the 25th day of August, A.D. 1930, and that the said animal was sold on the 23rd day of September, 1930, to Hugh Moore of Wainwright.

and that said animal may be redeemed by the owner or on his behalf within a period of thirty days from the publication of this notice in The Alberta Gazette, upon payment of all fees and costs due to the municipality and the purchaser of said animal.

R. J. TATE, Secy-Treas. of the Municipality of Battle River No. 423 Post Office Irma Alta.

Mr. Robt. S. (Scotty) Reid, who has farmed the Farrell farm at Fabian for several years, unfortunately had to be taken to Ponoka asylum last week when he became violently insane. Although he is a bachelor and has always lived alone, he was always cheerful and much esteemed by his neighbors who regret this unfortunate occurrence.

RAILWAYS STILL MAIN FACTOR IN TRANSPORTATION SITUATION AT PRESENT

With the airway and highway travel a factor in the transportation situation today, the railways have more than ever established themselves as the main supporters of the whole economic structure. Their contribution to the public remains the major one; their thousands of employees, through betterment of their wages, have continued to improve their social and economic status in the community. Disregarding changes of a temporary nature and limited duration, the Canadian railways' financial performance and outlook has improved consistently.

CHILD FELL INTO TANK AND DROWNED

A regrettable accident occurred on Friday afternoon last when Adrian Casper, two-year-old and youngest child of Mr. and Mrs. Casper Hendle, wealthy farmer of the Rosalind district, east of Camrose, fell into a water tank and was drowned. The little chap had evidently been looking at his reflection in the water and in some unaccountable manner missed his footing and fell into the tank, which contained about six inches of water. When the mother discovered the child, life was extinct.—Camrose Canadian.

CAMROSE-DAYSLAND HIGH- WAY WILL BE GRAVELED

The Canadian is informed that the contract for the graveling of the Camrose-Daysland highway, the grading of which was completed this summer, will be let within the next few days. It is understood that the work of graveling will begin almost immediately.

Under the policy to provide employment for the fall, and winter months, many pieces of public work are said to be under consideration. The graveling of the Camrose-Daysland-highway program is in line with this policy.—Camrose Canadian.

JASPER TO BE LISTED IN WEATHER REPORTS

Owing to numerous requests from residents in the middle west and the Pacific Coast, the Dominion Meteorological Department has installed a loop in the Canadian National Telegrapher's house at Jasper, Alberta, for the purpose of weather readings.

With the equipment supplied by the department complete reports will be sent to Toronto daily and Jasper will appear in the weather reports of the daily press of Canada. The operator who has been fully instructed in the use of the instruments will send readings covering barometer, temperature (highest and lowest), winds, direction and velocity, rain or snow and weather. These reports will be telegraphed at 5.30 A.M. and 5.30 P.M. daily to the Meteorological Station at Toronto.

ALBERTA TREASURER BECOMES MINISTER OF LANDS & MINES

Creation of a new provincial department of "lands and mines" with Hon. R. G. Reid, provincial treasurer and minister of municipal affairs as the administrative head was announced on Saturday by Premier J. E. Brownlee.

The new department will administer the greater portion of the natural resources being returned to the province on October 1 following the agreement ratified at the last sessions of the legislature and parliament.

Inasmuch as the new minister of "lands and mines already holds a dual portfolio, it is obvious that a cabinet re-organization will have to follow. "The re-organization of the cabinet will follow soon," declared the premier.

The fisheries department, said the premier, would be continued under the direction of R. T. Rodd, as already announced. This department, for the time being at least, would be under Hon. George Howley, minister of agriculture and health, in order to link it up with the game guardians work, it being the intention of the government to consolidate these two branches and use the same personnel for protective work. This consolidation of protective work would be extended by use of forest rangers who would also act as game guardians.

Irma Talkies

Lieut. Earl H. Robinson, flying-schoolmate of Col. Charles Lindbergh, and pilot and expert on aerial maneuvers for the epic motion picture, "Wings", was technical advisor for "Young Eagles", Paramount's new, breath-taking picture of war in the skies, which will show at Kiefer's Theatre, Irma, Wednesday, October 8th, at 8.30 P.M. 100 percent Talking. FINEST WEATHER AIDS TOURNAMENT

Innisfree, Sept. 27.—The annual tournament between the Mannville and Innisfree tennis clubs, took place here yesterday. Fine weather greeted the players and good games resulted. Following the games tea was served to the players at the home of Mr. Johnson.

In the ladies' doubles, Mrs. Hislop and Miss Bie of Mannville defeated Mrs. B. Hall and Mrs. R. Machin of Innisfree.

In the mixed doubles T. Atkin and Mr. Burch and Miss Shee. Mr. Costello and Mrs. B. Hall defeated Mrs. Johnson of Innisfree defeated Lemski and Mrs. Hislop.

In the men's doubles T. Atkin and Mr. Johnson of Innisfree defeated Mr. Burch and Mr. Osterhaus. Mr. Lemski and Mr. Burch of Mannville defeated Mr. Johnson and Mr. Costello.

In the men's singles Mr. Costello of Innisfree defeated Mr. Lemski of Mannville.

HOLDING DOESN'T PAY

The Poultry Division of the Dominion Department of Agriculture call's attention to the fact that it does not pay to hold eggs for a rise in the market. Past experience proves that holding eggs is a decidedly unwise practice and does only harm to the egg trade in general, particularly when eggs are held under any condition other than up-to-date cold storage. The old practice of country stores holding eggs for mixing with fresh stock on a favorable market has almost entirely disappeared and, in any event, grading shows the old eggs up at once. Consumers who pay the price for real fresh eggs expect to get what they buy. Eggs should be shipped promptly to market at all seasons of the year.

Russia's Five-Year Plan

Under all normal conditions the people of Western Canada would display merely an academic interest in events transpiring and developments taking place in Russia, but for some time past, and to an ever-increasing extent, Russian policy has had a bearing and a definite effect upon the prosperity of this portion of the Dominion, in fact upon the whole business structure of Canada, as well as of other countries.

It is difficult to find out exactly what is taking place in Russia, as many reports are both confusing and contradictory, consequently it is not surprising that people in this country are still puzzled and uncertain in their minds whether Russia constitutes a real and permanent menace to Canada, not politically or in a military sense, but economically.

Certain things have, nevertheless, become fairly well established. For example, it is known that in October, 1928, Russia inaugurated what is known as the "Five-Year Plan" of national development which observers on the spot in Russia describe as "the most interesting economic experiment anywhere in the world."

On October 1, 1930, the second year of this experiment will come to a close. So substantial has been the progress made that now the slogan is: "The Five-Year Plan in Four Years." What is this "Five-Year Plan"? "It was outlined by a Soviet Government agency over a year ago, and, in part, the plan—

"Provides for total capital investments in the five years beginning October 1, 1928, of \$33,000,000,000, or about two and one-half times the actual investments in the preceding five years. A goodly share of this will go for the construction of industrial plants and for the purchase of foreign equipment and machinery. The foreign-trade programme calls for imports of about \$3,200,000,000 during the period. Among the outstanding projects scheduled for construction, and in most instances completion, during the five-year period, are two tractor factories with an output of 40,000 units per year each, an automobile factory with an output of 100,000 cars per annum, a score of steel mills to produce over 5,000,000 tons of steel per year, many chemical, textile, machine-building, electro-technical, paper, glass, leather, and other factories, as well as a dozen or more large power plants, many mines, etc."

That was the "Plan," but, according to a Moscow correspondent of the Manchester Guardian, the "Five-Year Plan" in many instances is already surpassing the figures expected to be attained. He says: "The first version of the 'Plan' called for the production of 22,000,000 tons of oil and 10,000,000 tons of cast-iron in 1933; now these figures have been revised upwards, respectively, to 38,000,000 and 17,000,000 tons. The first 221 new industrial enterprises, built at a cost of approximately \$425,000,000, have begun to function, and the list of unusually large factories which have been completed comparatively recently, includes a tractor plant, an agricultural machinery factory, a paper mill, a pipe factory, two oil refineries, several electrical stations."

The "Five-Year Plan" also included what practically amounts to the nationalization of agriculture, and the erection of a vast system of agricultural machinery factories, oil refineries, etc., are all a part of this new agricultural policy. The Manchester Guardian correspondent in Moscow, further notes that "in collective farming, 25 per cent of the peasant households have already gone over to the co-operative method, although the 'Plan' originally contemplated only 20 per cent in 1933."

Russia is now dumping wheat, coal, lumber, into many European and other markets, further demoralizing the already badly demoralized world price for these commodities. The Russian Government is reported as having chartered a large number of vessels to convey wheat from Russia to England, Italy, and other countries, and that this wheat will be sold abroad regardless of price. The United States Government has charged that Russia has engaged in transactions on the Chicago grain markets to force down the price of wheat; the Canadian Government has secured power from Parliament to prohibit Russian imports into Canada; the League of Nations at Geneva, is discussing the effects of Russian policy on all other nations.

It is further alleged that under Soviet auspices this great "Five-Year Plan" is being carried out by poorly-paid labor, and much of it forced labor, even convict labor; that the standard of living has been definitely lowered; that food and even clothing supplies are sharply rationed, with the result that other countries, with higher standards of living and greater individual liberty of action, cannot begin to compete with Russia.

The Bolshevik propaganda of Russia failed in its efforts to bring about world revolution, but its "Five-Year Plan" of economic development at home with a view to dumping huge quantities of goods and products of all kinds into world markets is, even before the "Plan" is one-half completed, having an adverse effect in all other countries, and further depressing already depressed business conditions throughout the world.

The farmers of Western Canada, who must depend for their success upon making profitable sales of their products in world markets, are among the chief sufferers.

British Capital For Alberta

Anglo-Western Oils Limited To Commence Development Work

Five million dollars of British capital, organized under the name of Anglo-Western Oils Limited, with a federal charter and headed by Sir Edward Marville, chairman of the Phoenix Oil and Transport Company, and of the Daimler Company, both of Great Britain, has been made available for Alberta oil development, according to an announcement made in Calgary recently.

The announcement was made by J. C. Dallas, managing director of Calumet Oils Limited. Mr. Dallas said the company had acquired 490,000 acres in Alberta and two wells would be sunk immediately in the Milk River area.

THE ANAEMIC GIRL

Who Has Lost Her Charm and Beauty

"She seems to be losing her looks." This remark is often heard about girls who were once noted for their sparkling eyes, their rosy cheeks and their vitality. The cause is not far to seek—they have become anaemic; that accounts for the pallor and the loss of charm. The anaemic girl, if she neglects her health, may be a sufferer all her life.

Take heed, you pale, anaemic girl. Plenty of fresh air, nourishing food and rest will help you, but what you need most is good blood. Those wretched headaches; that flake appetite and those terrible heart palpitations can only be banished if the blood is rich, red and pure.

Good blood—the kind that brings good health—is created by Dr. Williams' Pink Pills. The whole mission of these Pills is to build rich, healthy, glowing blood. The Pills are sold by all dealers in medicine or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

High Educational Standard

Canadian School System Impresses Educationists

Visitors to Canada are invariably impressed with the country's educational system, particularly if they be men especially interested in the subject. It is greatly to be doubted if any nation on earth excels our own in the matter of schools of all kinds. Our educational system is thorough, standards are high and our graduates emerge from schools and colleges with diplomas that have all-around place their service to the great demands across the line—border Cities Star.

Do not allow worms to sap the vitality of your children. If not attended to, worms may work irreparable harm to the constitution of the infant. The little sufferers cannot voice their ailment, but there are many signs by which mothers are made aware that a dose of Miller's Worm Powders is necessary. These powders act quickly and will expel worms from the system without any inconvenience to the child.

Preparing For Old Age

Small Part Of Earnings Should Always Be Set Aside For Eventualities

No pension machinery, however well planned, can protect the man who lacks self-control to devote a small part of his earnings consistently to the protection of himself and his dependents.

That statement from the Carnegie Foundation for the Advancement of Teaching, itself a pension agency, is particularly suggestive.—Kansas City Star.

To have the children sound and healthy is the first care of a mother. They cannot be healthy if troubled with worms. Use Mother Guard Worm Extirminator.

"I notice that customer you just attended to didn't buy anything, yet he seemed pleased," said the eagle-eyed floorwalker. "What did he want to see?"

"Me, at 8 o'clock tonight," replied the pretty clerk, blushing.

How a disease wipes out human beings who are not resistant to it, was shown when influenza was introduced into a Labrador community by 200 Eskimos, causing the death of 300.

DO YOU SUFFER WITH HEADACHE?

So easy to get quick relief and avoid an attack in the future. Avoid bromides and dope. They relieve quickly but affect the heart and are very dangerous. They are depressing and only give temporary relief, the cause of the headache still remains within. The sane and harmless way. First correct the cause, soothe the sour and acid stomach, relieve the intestines of the decayed and poisonous food matter, gently stimulate the liver, start the bowels moving and the bowels pass off the waste matter which causes your headache. Try Carrier's Little Liver Pills. Druggists 25c red pkg.

Real dyes give richest colors!

FOR every home use, Diamond Dyes are the finest you can buy. They contain the highest quality coloring matter that can be produced. It's the aniline in Diamond Dyes that give such soft, bright, new colors to dresses, drapes, lingerie. Diamond Dyes are easy to use. They go on smoothly and evenly; do not spot or streak; never give things that look dyed. Just true, even, new colors that keep their depth and brilliance in spite of wear and washing. 15c packages. All drug stores.

Diamond Dyes Highest Quality for 50 Years

American Food Demands

More Sugar, Fruits, Fats and Milk Products Are Consumed

The average American of 1930 will consume 150 pounds more food this year than his predecessor of 1900, according to the American Research Foundation.

"More sugar, fruits, fats and oils, and milk products are being eaten by the people of United States," says the Foundation.

"The per capita consumption of sugar is estimated at about 105 pounds this year, compared with 61 pounds per capita in 1900. Fats and oils will average about 44 pounds per capita this year, compared with 34 pounds a generation ago.

"Milk products consumption has increased from 840 pounds to 1,040, and eggs from 159 to 192 pounds per capita.

"Meat consumption has shown little variation, ranging from 142 to 145 pounds a year per person.

"Figuring the increases with the declines, the average per capita food consumption shows a gain of 150 pounds annually in the last 30 years. "An increasing preference for energy and heat producing foods is evident in the modern American dietary. Sugar largely supplies energy, while fats are necessary in generating heat and power for the body.

"Starch, fruits and cereals, and dozens of other items on the daily menu have a high fat content. The exceptional value of fats is that, in addition to supplying energy, they aid digestion by enhancing the palatability of foods consumed in the average meal."

Canada Honors Her Scientists

Not Without Honor In Their Own Country Says Manchester Guardian

Canada's treatment of her scientists was lauded by the Manchester Guardian in a recent article on Dr. F. C. Banting, the young Toronto research worker who won fame for his discovery of insulin. The Guardian says: "It can never be said of Canada that her prophets are without honor in their own country. The case of Dr. Banting, the discoverer of insulin, is typical, for the brilliant young scientist has already received at the hands of his people all the honor of personal appreciation that they can bestow. From other countries too he has received the recognition which is his due, for he is probably the youngest man to win the Nobel Prize.

What the world owes to him can scarcely be computed, although when he first announced his discovery it was received throughout the world with a certain amount of credulity. The results obtained, however, soon placed the result beyond all doubt, and the Canadian Government took the unusual step of voting him a life policy to enable him to continue his medical research.

The Man With Asthma, almost longs for death to end his suffering. He sees ahead only years of endless torment with intervals of rest which are themselves fraught with never ceasing fear of renewed attacks. Let him turn to Dr. J. D. Kellogg's Asthma Remedy and know what complete relief it can give. Let him but use it faithfully and he will find his asthma a thing of the past.

Britain's Youngest Aviator

Miss Winifred Jess Drinkwater of Paisley, Scotland, is Britain's youngest aviator, having just received her pilot's license at 17, the minimum age for a British pilot. In flying solo she handles her machine like an expert. S. Baldwin, secretary of the Scottish Flying School, says she will be a great flyer.

Traveller: "May I show you my samples, sir. If you remember, I executed your last order with promptitude and dispatch."

Important Person: "I gave you no order!"

Traveller: "Pardon, sir, you said 'Get out' and I got."

The consumption of rice in Siam amounts to 400 pounds per person annually.

Minard's Liniment aids tired feet.

Car Elaborately Equipped

Fittings In Limousine Of Jugo-Slavian King Very Complete

A Packard sedan limousine, recently delivered to King Alexander, of Jugo-Slavia, is said to be one of the most elaborately equipped automobiles in Europe. The space under the glass partition separating the rear compartment from the driver's space is divided into a number of compartments. A large locker in the centre is fitted with a leather lunch kit, equipped with a complete silver and gold table service. In a double compartment at the right are thermos bottles for warm foods and a large toilet case. Thermos bottles for hot or cold liquids are fitted into a cabinet at the left of the centre locker, and in the top of this space are a first-aid kit and a large cigarette case. A built-in compartment for the King's sword extends across the top of the three compartments, and the lid, which protects the sword against dust, becomes a shelf when closed. Immediately in front of this is a tray to accommodate road maps.

Source Of The Thames

Seven Springs In Cotswold Hills Feed World's Most Famous River

How many people—even among the millions who live upon its banks—could say offhand where the source of the Thames was to be found? The fact that so few of us know anything about the beginnings of the world's most famous river is reflected in the statement that, until recently, the Thames had its source in a rubbish dump. Now the rubbish has been cleared away, and visitors to the source will find a little pool in a wood hollow, with, on one side, a stream gushing out. It is Seven Springs, the source of the Thames, but there is nothing to tell anyone that this is the case, and in the quiet Cotswold Hills, where Seven Springs is situated, we are not thinking of London and London's River. However, a plan is now on foot to lay out the site in a worthy manner and to build a fountain through which the Seven Springs may flow.

Give the Devil His Due

An old Scottish woman, who had never been known to say an ill word about anybody, was one day taken to task by her husband, "Janet," he said impatiently, "I do believe you'd say a good word for the devil himself." "Ah, weel," was the reply, "he may na be sae guid as he might be, but he's a very industrious body."

A famous boxer has a complete record of his fights. No doubt he keeps them in a scrap book.

Her Two Children Had Summer Complaint

Mrs. J. J. MacDonald, Glace Bay, N.S., writes: "I am the mother of six children, and would not be without a bottle of Dr. Fowler's Extract of Wild Strawberry in the house. My two youngest were very sick with summer complaint, and there was nothing I tried could equal that remedy, and I had tried most everything, but they could get no relief. 'Dr. Fowler's' made a change in both of them in less than two hours."

On the market for the past 35 years; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Appleford Paper Products

HAMILTON LIMITED ONTARIO

Sales Have Increased Rapidly

"Dry Ice" Is In Demand All Over the Country

The first pound of "dry ice" or solid carbon dioxide was sold for commercial refrigerating purposes in 1925, by the Dry Ice Corp., of America, and it is expected that "dry ice" sales for 1930 may reach \$5,000 tons.

This material is being produced in 18 plants from coast to coast in the United States.

Gaseous carbon dioxide as generated from the evaporation of "dry ice" is of course cold, and by virtue of the low temperature of its origin, extremely dry.

Christopher Latham Sholes is known as the inventor of the typewriter. His first "writing machine" was the end of a telegraph key with the letter "w" cut in brass.

Canada Held As Example

Has Solved Problem Of Minorities Says Sir Robert Borden

Canada was held up before the Assembly of the League of Nations as a shining example to peoples who are striving to solve the vexing problem of the minorities.

Sir Robert Borden, former premier of the Dominion, told representatives of Germany, Poland and other nations, whose relations are being constantly disturbed because of the presence of foreign racial groups within their borders, that the problem could be solved, and solved justly and happily.

"Give to the minorities every constitutional and legal right beyond a shadow of doubt," Sir Robert said. "On the other hand, impress upon them the necessity for their co-operation."

Over a Hundred Varieties

A single tree with approximately 125 varieties of apples has been grown near Martinez, California, by George Upham. It took more than twelve years of experiments to obtain the phenomenon. Upham has been grafting branches to the original tree since 1915. In the spring the grafted limbs bud at different times with blossoms in dozens of shades.

Minard's Liniment has a hundred uses.

High Protein Content Of Western Wheat Is Revealed In Tests Just Completed

Canada's current wheat crop has a very high protein quality of grade and shows higher gluten content than yields of the past three years. It is revealed in tests just completed for the Canadian Grain Commission.

Result of the tests, conducted by R. J. Birchard, commission chemist, at Winnipeg, were reported yesterday to F. G. T. O'Hara, deputy minister of trade and commerce. Summing up, it may be stated the general baking quality of the present crop is fully equal, if not superior to that of any crop tested since inception of the commission laboratory in 1913, says the report.

"The quality of the protein (gluten) is excellent and the average amounts of 13.4 per cent. compares very favorably with that found in previous years," Mr. Birchard reports. "The average for 1929 was 15.3 per cent. for 1928 was 12.3 per cent. and for 1927 was 11.4 per cent."

The high protein content of excellent quality, the unusual dryness of the wheat and the excellent baking quality of this year's crop should be of special interest, particularly to the millers of England, France and Germany, since the crops of these countries are reported to be suffering severely from the effect of excessive moisture with consequent damage to the quality of the grain.

"Over 60 per cent. of the crop received to date in Winnipeg this year, graded either No. 1 Hard or No. 1 Northern, 23 per cent. graded No. 2 Northern, and only three per cent. No. 3 Northern. Very little grain graded No. 3 Northern or lower is being received at the present time. Practically no tough or damp cars have been received."

"The weight per bushel of the different grades is practically the same as that of last year, though the weight of the No. 3 Northern as received to date is lower."

"The comparative yield of flour from the different grades is about the same as last year with the exception of that from No. 3 Northern, which on account of the lower weight per bushel, is somewhat lower."

"Practically all the wheat is sound and mature, bringing little difference between the baking quality of the grades. Samples from which the test were made were gathered from the three provinces of the prairies, and are characterized as fairly representative of the crop as received to date. Relatively little Alberta wheat was present in the samples tested, however, and character of Nos. 3 and 4 Northern may change somewhat as to weight and flour yield."

The report approves standards for Nos. 1 Hard, 1 and 2 Northern, but sets only tentative standards for Nos. 3 and 4 Northern and Nos. 4, 5 and 6 Special. This, it is stated, is due to the fact that it is considered probable that some frosted wheat from the northern districts may appear later.

The three special grades in the tentative standards, it is mentioned, are included to take care of a certain amount of sound wheat, but of low weight per bushel. Flour yield from these grades is greatly reduced, and the color is very yellow, but baking quality is otherwise excellent.

Buy Graded Beef

Blue Brand Grade Is Preferred By the Average Customer

The Beef Grading Service of the Dominion Department of Agriculture is stimulating public interest in the buying of good beef and each week shows more conclusively that where quality counts beef is bought by grade. Buying beef by grade is the only way you can be sure of getting beef you will like. The grade "Choice" is always branded in red, and the grade "Good" in blue. Blue brand is the grade preferred by the average customer and is the grade in greatest supply.

Heavy slabs of jade were used as tablets on which to carve writings in ancient China.

"Have you any rat poison?"
"No, but we can let you have a gas oven."—Kasper, Stockholm.

Some Of World's Biggest

Patriotic Statisticians Have Proved France Has Her Share

"The biggest in the world" so often has been the raucous shout after achievements in the United States that the French have been rather annoyed. Yet, some of their inquiring minds of late have dug up world's records. When Deudonne Coste and other French aces in past months brought back half the world's records to France, patriotic statisticians added to those achievements these other "biggest" things:

The Eiffel Tower, highest structure in the world.

The biggest reinforced concrete bridge, at Saint-Pierre-du-Vauvray.

The biggest metal viaduct, at Viar, in the Cevennes Mountains.

The fastest electric train, from Bordeaux to Bayonne, 123 miles in a shade under 66 miles an hour.

The biggest aviation kangars at Orly.

The biggest airport at Le Bourget.

The biggest underground canal on the Rhone just outside Marseilles.

The most powerful searchlight, that at Mount Valerien, just west of Paris, developing a billion candlepower and throwing a beam of light over a hundred miles.

The world's fastest warship, the cruiser "Tourville."

The biggest wireless station at Saint Assise.

(By Eva A. Tingey)

FOR MANY FIGURES

All Tingey models are created and sketched in Paris and the patterns are made in New York.

A stunning sports dress this, and suitable for many figures. It is modish and chic for the normally built woman, and will also have a slender effect for the heavier type. For the short girl it is snappy too, as its long line bodice cut, hip point and skirt panel all have length giving qualities.

Note the smart new vestee, too, which buttons on top one side instead of tucking in as such affairs generally do.

Black wool georgette, silk marocain, or white spotted crepe de satin or marocain vestee will make a nice, dressier scheme for the heavier woman.

This pattern may be obtained in sizes 14 to 30 and 34 to 40. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

Demand For Canadian Apples

Several Thousand Boxes To Be Shipped To The Orient This Year

Until last year the Canadian-grown apple was an unknown delicacy in China. Some shipments were made to Hong Kong during the latter part of 1929, and the Chinese, like Oliver Twist, want more. This year it is expected that several thousand boxes of Canadian apples will go forward to the Orient, for the Canadian Trade Commissioner at Hong Kong advises that Chinese importers are now interested in the Canadian-grown fruit.

The high quality of Canadian apples has been demonstrated at the Imperial Fruit Show, held annually in the British Isles, where for several years Canadian exhibitors have been awarded the majority of the most coveted prizes. Year after year the judges have agreed that the McIntosh Red, an apple of ruddy complexion and incomparable flavour, is the best dessert apple in the world. This apple originated in Dundas County, Ontario, over a century ago.

This year's apple crop in Canada will, it is estimated, total about 3,113,000 barrels.

Cost Of Crop Production

Potatoes Showed Greatest Profit In Experiment Conducted At Ottawa

Some interesting experiments concerning the cost of producing farm crops have been made by the Canadian Government Central Experimental Farm, Ottawa. For example, it cost \$20.22 to produce an acre of corn having a value of \$33.08; the cost of producing hay in 1929 was found to be \$19.60 an acre for hay valued at \$34.06; ensilage corn cost \$4.28 an acre more to produce than it was worth at current values—the cost per acre was \$54.02 with an acreage crop value of \$30.24. In the case of mangels, it cost \$72.45 an acre to produce the crop and the yield of 17.81 tons per acre, valued at \$1.91 a ton, was worth only \$34.02; or, mangels showed a loss per acre of \$28.43. Potatoes on the other hand proved a particularly profitable crop, showing a surplus of \$97.94 per acre over cost of production; potatoes cost \$80.99 per acre to produce and yielding 192.4 bushels, valued at 92 cents, showed an acreage value of \$178.93.

A Longevity Record

Ayrshire Cow Has Made Money For Its Owner

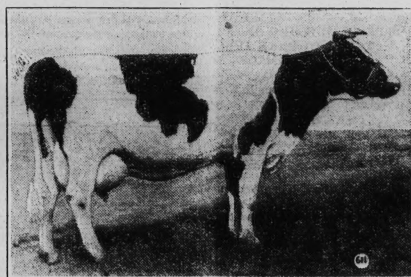

A striking instance of the longevity and productive qualities of the Ayrshire breed is furnished by Violet, a member of the herd of S. P. Chaplin, Agassiz, B.C.

Bred and raised by William Mackie, formerly of Agassiz, Violet was born on July 11, 1912, and is thus over eighteen years old. Yet, despite her age, in her last lactation period she produced 11,463 lbs. of milk and 424 lbs. of butterfat in 365 days; this record being made on twice-a-day milking under ordinary farm conditions.

Cork Airport May Be Base

German engineers have been surveying Cork airport for a site suitable for a contemplated base for a regular trans-Atlantic aerial service. The plan of the engineers is to institute weekly direct service between Cork and Lakehurst, N.Y., with Zepelins capable of carrying 120 passengers and 10 tons of mail, in addition to the crew of 46. The cost of such a dirigible is estimated at about \$1,900,000.

A Cow With A Record

Belvedere Dekol, Ruby—62032, of the herd owned by the Canadian Pacific Railway at Strathmore, Alberta, made the third highest mature record in Canada in 1929, being exceeded by one cow in the Strathmore herd, and an outstanding cow in Saskatchewan. On June 14, 1929, she finished a record of 27,892 pounds of milk and then went out on the Show Circuit, taking first prize at Brandon and first at Vancouver, Victoria and New Westminster. What she did is seen by comparison with the milk record

Guard Against Gases

Forming In The Silo

Two Poisonous Gases Which May Occur In Any Silo

Before entering the silo the farmer or any one working for him should make sure that no deadly gases are present, is the admonition of silo experts of the Dominion Department of Agriculture.

At Herron, North Dakota, the other day the Neldhardt family, father and four children, had their lives snuffed out by what was reported to be Methane gas. The sheriff who attempted to recover the bodies was overcome and barely escaped with his life, after his son had made attempts to get his father out of the silo.

Methane and carbon dioxide are the two poisonous gases which are likely to occur in any silo. They have their origin in the decomposition of organic matter. Methane CH₄ is an odorless, inflammable gas which occurs naturally as the product of the decomposition of organic matter, and is frequently met with in marshes and mines, being more familiarly known as marsh gas. Carbon Dioxide CO₂ is a heavy colorless irrespirable gas which extinguishes flame. It is produced by the action of acids on carbonates, through fermentation, and by the decomposition of organic substances.

Both these gases may be present in the silo and owing to the fact that they are heavier than air as they accumulate, they force air away from the top of the silo.

As neither Methane or Carbon Dioxide will degenerate within a few days, it is always well before entering a silo during the filling season, to run the blower a few minutes to insure an adequate circulation of air. At other times a lighted lantern should be lowered into the silo to insure that no gas is present. If Carbon Dioxide is present the flame will immediately go out.

There is just as much danger from poisonous gases in the silo as there is in an old well, but the danger one which may be easily guarded against and is overcome by an adequate supply of fresh air. As ensilage is fed from the top of the silo care should be taken to see that the doors are open to allow free ventilation. Fresh air should be supplied as directly to the top of ensilage as possible.

A Big Business

Agricultural Wealth Of The Dominion Reaches Nearly Eight Billion

Few people appreciate the dollar value of agriculture in Canada, or realize that it is really a big business. The Dominion Bureau of Statistics estimates the agricultural wealth of the Dominion as for the year 1929, at the huge sum of \$7,578,623,000. This figure is made up of the following estimated values: Lands, \$3,361,061,000; buildings, \$1,382,684,000; implements and machinery, \$665,172,000; livestock, \$884,167,000; poultry, \$63,854,000; animals for fur farms, \$19,477,000; and agricultural production, \$1,667,218,000.

Her Reason

The sick man was well again. "Mary, I shall never forget it," he told his wife. "Your sweetness to me shall be like a golden corner in my memory. Why did you do it?" He paused dramatically, hoping to hear a whispered confession that her love was the great motive. Instead she replied calmly: "Well, John, who wants a widow with four children?"

Moist Heat As a Health Factor Should Be Considered In Heating Homes During Winter Months

A family's health and comfort during the winter months, in this or any climate, depend on proper heating means other than one single factor.

Family physicians will confirm this. Knowing the essentials of healthful heat is therefore necessary, if a householder is to act wisely on this important question.

A healthful summer atmosphere is made up of temperature, air motion and humidity. Temperature alone is not the major problem of home heating, however. The first requisite for healthful, artificial heat is that it provides sufficient humidity to meet the requirements of the body. This is recognized and cannot be ignored except at the expense of health and comfort. Hot dry air in homes may be directly blamed for the 50 per cent. increase in the mortality rate during the winter months. The importance of moisture in the air breathed cannot be stressed too heavily.

Moist heat as a health factor should be given first consideration when making a choice of the system to be installed in a home, for upon it will depend the health of the family. Medical authorities recommend that room temperature never exceed 70 degrees Fahrenheit. To remain in an atmosphere heated above this point lowers both vitality and resistance and weakens the body's ability to cope with the contrast between indoor and outdoor temperatures.

There are still other benefits from correct humidity besides the health of the family, and that is the economy in fuel bills. It costs more to raise the temperature from 70 to 75 degrees than from 60 to 70 degrees, and moist air at 70 degrees is far more comfortable than dry air at 75 degrees.

"In the old days it was thought that the atmosphere in the home became vitiated of its oxygen as the air was breathed and charged with carbon dioxide exhaled from the lungs. Recent conclusive experiments prove this. Occupation of the home actually decreases the amount of oxygen therein and increases the amount of carbon dioxide, but the results of this are so negligible that the differ-

ences can hardly be measured or detected.

In this country of cold winter climates there are three distinct types of heating equipment and each has its advantages and disadvantages. The stove, while crude in many respects, has many advantages over some types of apparatus. The most common types of equipment are the radiator—which may be either steam, hot water or vapor—and the register which is used on many and varied kinds of warm air plants.

The operation of these different types of plants affect the occupant of the home. The radiator type heats the home by means of the air in each individual room passing over each individual radiator and picking up what heat it can as it passes over. When the fire is high, naturally the radiator is hottest and the air moves faster in the room, which causes the temperature to rise more quickly, and as the fire burns lower the air scarcely moves. These radiators and connections must be absolutely water and moisture tight or they will leak, and except for the vent on the steam radiator, there is no chance of any humidity unless supplied by pans or other devices attached to the radiator.

Neither is there any possibility of air circulation except by the action caused by the heated radiator, as mentioned. Somewhat the same action is obtained with the average type of warm air furnace, except that the body of the furnace over which the air passes, by being conducted through the return air pipes to the furnace casing, is much hotter than the radiator, and the air is expanded to a greater degree and purified by being intensely heated, and creates much more action than when passing over the radiator.

Has been proven by medical men that a warm air furnace can be operated in contagious hospitals with scarcely any danger of distributing germs to adjacent rooms. This is due to the temperature of the air as it passes the hot furnace and the rapid circulation it attains. We all know from experience that running water will purify itself when in action, in a very short distance.

Holding Doesn't Pay

Holding Eggs For a Rise in Price Considered To Be Bad Practice

The poultry division of the Dominion Department of Agriculture calls attention to the fact that it doesn't pay to hold eggs for a rise in the market. Past experience proves that holding eggs is a decidedly unwise practice and does only harm to the egg trade in general, particularly when eggs are held under any condition other than up-to-date cold storage. The old practice of country stores holding eggs for mixing with fresh stock on a favourable market has almost entirely disappeared and, in any event, grading shows the old eggs up at once. Consumers who pay the price for real fresh eggs expect to get what they buy. Eggs should be shipped promptly to market at all seasons of the year.

An Interesting Experiment

Honey Kept For Fifty-Eight Years Resembles Blackstrap Molasses

Fifty-eight years ago a hive of honey bees made some white clover honey that has been kept by the United States Department of Agriculture and tested at intervals throughout a half century or more. Once almost colorless, this honey now resembles blackstrap molasses. Its original flavor has changed until it now tastes considerably like buckwheat honey.

However, this honey would not be out of place on steaming hot cakes or waffles at this time, but for the fact the department plans to age it indefinitely or until it is no longer fit for consumption, testing it from time to time to note chemical changes. All kinds of honey darken after the first few years, and the flavor also changes.

Divorce Easy In Russia

A two-hour glimpse of the workings of a Soviet divorce "court," as described by an eye witness, gives eloquent testimony to the complete breakdown of the sanctity of marriage under Bolshevik rule. Application to a girl in charge of the registry office is the only formality needed to secure the necessary certificate of marriage or divorce in the "court."

He—"So you don't want to marry me, Doris?"
She—"That's different! You said something about being yours forever."

Crop Rotation

The Most Efficient Way In Which To Maintain the Fertility Of The Soil

The maintenance of soil fertility is absolutely essential to successful farming. Unless the soil is in a fertile condition it is impossible to produce large crops and large crops are a prerequisite to profitable farming. Observe field husbandry experts of the Dominion Department of Agriculture. The adoption of a good system of crop rotation involves no additional expense and is the most effective way in which to maintain the fertility of the soil and thereby increase the yield of farm crops. In addition, crop rotations assist in the control of weeds, and help to keep in check insect pests and fungous diseases. The labour on the farm, too, is better distributed throughout the season when suitable acreages of various crops, planted and harvested at different times, are grown in rotation.

New Mining Regulations

Mining syndicates and individual prospectors are being advised that under the new mining regulations for Manitoba, since the taking over from the Federal Government of the natural resources, the assessment work requirement is now only 25 days instead of 40 days.

Dealer: "It's a genuine antique, sir."

Customer: "But you are asking a fearful price for it."

Dealer: "Well, sir, look how wages and the cost of materials have gone up!"

"You say your grandfather's age is 130? Nonsense!"
"Well, he died in 1900 aged 100, and now it is 1930."—Pages Gates Yverdon.

The Navy Looks Her Over

Expert criticism of the Canadian Pacific's new 25,000-ton liner, "Empress of Japan", is depicted in the above picture, which shows two British ships, the Pacific Empress and the Pacific Empress, sailing at her berth in Vancouver, B.C. The new

White Empress, which broke all records on her first voyage, is steaming from Yokohama to Vancouver in 8 days, 6 hours and 27 minutes, will make Honolulu a regular port-of-call on her voyages to the Orient.

IRMA TIMES

The Alberta Oil Gazette

H. W. LOVE, Prop.

A Good Advertising Medium and a
Reliable Newspaper on Oil Activities

One way to relieve the unemployment situation and stimulate business conditions would be to start your Christmas shopping now and do it in the local stores.

Hon. R. G. Reid, provincial treasurer, has been appointed minister of natural resources, which are being taken over by the provincial government today. Regardless of political affiliations, Albertans in general, will wish the former Mannville farmer, success in his new important duties.

Almost daily we read of stores and business places in small towns being entered and robbed. There seems to be a regular epidemic of this kind of pilfering and theft. Local business men would be well advised to see that their establishments are securely locked at night, and that no large amounts of money be left in the store after business hours.

With every thresherman's rain to go, rigs all fitted and steamed up on Monday morning, a drizzle set in that put another stop to the harvesting of this year's crop in this district. The crews were all dispersed until another bright day shows up. Many discouragements have been met in the harvesting of this year's crop and to say the very least it has been discouraging and almost heart-breaking. With the low prices prevailing for the crop when threshed, is the last straw that breaks the camel's back. The silver lining to the situation is the eternal hope that springs in the human breast—of a better year next year.

The annual report of the western air mail service stating that not one pound of mail nor one life had been lost during the year was just off the press when the first accident occurred near Calgary when the pilot and two passengers were killed when the air mail plane crashed on its way to Medicine Hat. The accident is regrettable in more ways than one. Lives were lost, and public confidence in airplane travel has been shaken. Night flying conditions in the prairie provinces are as yet not of the best, and it would seem that in the interest of the public at present this phase of the service could wisely be eliminated.

We cannot help but smile when we read the effusions of the swivel-chair farmers who edit a great many of the farm papers and magazines that come to our desk each week, advising the farmers how to farm. One tells the farmers they should raise hens and sell the eggs, the price is so good. Another tells them to raise hogs, it doesn't cost much and can be sold any old time. Another says milk cows and happy days are here again. We venture to say that if the price of wheat was where it was a year ago, wheat raising would have been the proper career. After all, farming on any scale, in any capacity, is a big gamble, and that's all there is to it. If you can peer into the future and tell the farmer what to do next year—ah, but what's the use.

VEGREVILLE BOARD OF TRADE TO MAKE TRIP TO CAMROSE SOON

A delegation from the Vegreville Board of Trade will come to Camrose at a date to be set in the near future to discuss with the Camrose Board of Trade, the proposed Calgary-Camrose Vegreville-Cold Lake Highway. The Provincial Government is going ahead with plans to relieve unemployment under the Federal Unemployment Relief Plan, and recommendations are being made to the government by the various Boards of Trade as to proposed government highways.

Under the Federal Relief Plan, the Dominion Government will provide dollar for dollar for the relief of unemployment. — Camrose Canadian.

It pays to read advertising messages in this paper, week by week, they contain store news, and information of much value—offerings of bargain buys which mean money saved to the careful shopper! Incidentally, it is mighty poor economy to be without the local paper—its advertising news alone will, in the course of a year, more than repay in dollars and cents the price of the annual subscription.

VIKING

Other cities and towns are placing their claims for a share of that twenty million dollars the federal government has voted for public works and relief of unemployment. What is Viking and district doing in this regard?

Mr. and Mrs. G. W. Green and sons Harold, Bobby and Jack, returned from a two months motor trip to Findlay, Ohio, and other eastern points. Economic conditions in the middle western states are much worse than in Canada, states Mr. Green. The crops in general have suffered from drought and through a greater part of the territory covered on the trip the fields looked burnt up. The highways and the accommodation at the various auto camps enroute were a very pleasant part of the 8,000 mile journey there and back.

Last week Mr. and Mrs. Geo. Patterson of South Haven, Michigan, were visitors at the home of Mr. and Mrs. Halliday. Mrs. Patterson is a sister of Mr. Halliday whom he had not seen for nineteen years. They are making a circle motor tour thru Winnipeg, the prairie provinces to the coast down to California and back to Michigan visiting relatives and friends enroute.

Two potatoes, one weighing 1 lb. 8 ounces, and another weighing 2 lbs. and 5 ounces, grown on the Herman Kjelland farm north of town were brought into this office last week. We have now handed the title of potato king to Herman. With such fine large samples of spuds grown in this district, it seems to us that somebody should make a specialty of growing a certain size and variety of potato for the market.

Local barnyard golfers had a yen to go to Vermilion on Monday afternoon to try and lift the King Edward hotel trophy which now calls that burg home sweet home. The lowering skies put a damper on the spirits of the more ambitious, and until a more opportune day shows up, the cup will languish up in the city of the sandhills for some time yet.

The Viking Movies have changed the name of their picture show to "The Palace." It is well named as it is one of the finest halls in the province. Manager Collins has reduced his prices, but not the quality of the entertainments, and larger crowds in attendance at the shows should be the result.

Chas. Whiteman arrived from Calgary on Monday and will erect the derricks for the gas well the North-western Utilities will drill next spring.

Casper Kresant, employed on the Harry Child farm south of town, saved the end of the third finger of his right hand off while sawing wood with a power saw last Thursday. He was brought to town for medical attention.

C. W. Stenberg, of Albany, Oregon, has been in town the past few days looking after some farming interests.

Miss Kay McGregor, who holds a position in the Armstrong department store at Wainwright, was a visitor in town with friends on Sunday.

Mrs. Cleverdon and daughter Miss Alice left on Tuesday evening's train for Phoenix, Arizona, where they intend to reside for some time.

Hrold Merrick, of Wainwright, has accepted a position as assistant to Angus Ross at the Bawf elevator.

Miss Dorothy Jones left last week for Edmonton where she will take up studies at the University of Alberta.

S. Olyan, manager of the Shoppe-Rite stores for Alberta, was in town last week.

Miss Audrey Taylor has accepted a position in Clinton's Groceries.

W. E. Henton, manager of the King Edward Hotel, was a business visitor in Edmonton the last of the week.

Mr. and Mrs. H. P. Stock motored to Edmonton on Sunday returning the first of the week.

J. S. McGowan, Manager of the Colonization and Agriculture Department of the Canadian National Railways in Western Canada, who has been appointed Assistant Director of the same department, with headquarters in Montreal.

The Wastebasket

Our old fashioned grandmothers who liked to operate a spinning wheel, seem to have a lot of granddaughters who prefer to operate the steering wheel, says a careful observer.

A careful observer says that finding a needle in a haystack is almost as difficult as finding a needle in a woman's hand nowadays.

People that you don't care very much about—the fellow who shows up with a nice little scheme for spending your money.

"What are the signs of the times?" asked a teacher here of a high school student who had just returned from a hunting and fishing trip. "Keep Out," "No Fishing," "No Hunting," "No Trespassing," he replied.

Something for stout ladies to worry about—a hippopotamus frequently grows to a weight of five tons.

A local fellow who took a job on a farm this fall, was surprised the very first morning when the farmer rapped on his door at four o'clock and told him to get up. "What for?" he asked. "Why, we're going to cut oats," the farmer replied. "Are they wild oats that you've got to sneak up on them in the dark?" the young fellow replied.

"We will have to hurry or we will not reach the church in time to see the wedding," said a lady in a neighboring town to her little daughter. "But couldn't we take in the second performance?" the little girl asked.

Things to worry about —
Your neighbors.
Growing old.
Squeaky shoes.

The Chinese are said to be the greatest people on earth for making word pictures. When they want to write the word "trouble" they draw a picture of a house with two women in it.

It's a gay life. A young fellow down near Killam asked for the girl's hand and got the old man's foot.

One of our young men gave his best girl a ouija board last week and went down to her house to try it out. She asked, "Who shall I marry?" It answered, "the other fellow."

"In days of old, so we are told, the Dollar went much farther than it is getting back to Father."

This Morning's Smile
Young Lady:—"Oh dear, I'm afraid there's nothing quite suitable. You see I want to give my husband a big surprise on his birthday."

Exhausted Clerk: (fed up)—"Then why not hide behind the door and shout boo at him?"

BOSTON IS MADE PORT OF CALL

The Canadian National Steamships has completed arrangements to make Boston a port of call this winter for the ships in the British West Indies service.

With the call at Boston, Western Canada passengers will be able to save a day, reaching Boston in eleven hours from Montreal by Canadian National connections direct with the ship. The ships are the "Lady Somers", "Lady Rodney", "Lady Drake", "Lady Nelson", and "Lady Hawkins". Freight will not be taken to or from Boston on the new service. In addition to a saving in time for passengers, this provides for weekly sailings from Halifax to Boston and fortnightly from Boston to Halifax and fortnightly from Boston to St. John.

KINSELLA NEWS

Mrs. Holmes who is working at Wainwright in the hotel spent the week end at her home here with her husband and son.

Miss Evelyn Corbett of Edmonton is spending some time here with her parents Mr. and Mrs. D. Corbett.

Miss Gladys Davis of Vegreville spent Sunday at the home of Mr. and Mrs. George Lee.

Mr. and Mrs. Wanginess and daughter and Mr. and Mrs. Smogard spent Sunday at Viking.

Mr. and Mrs. Trenhall of Vegreville spent the week end with Mr. and Mrs. Corbett.

Mrs. Haukesworth, son and daughter of Vermilion spent Sunday with

the former's daughter Mrs. J. Neale. Miss Ellen Neale returned from Vermilion on Sunday where she had been for the past few weeks with her grandparents.

Mr. Jack Corbett returned to Edmonton on September 24th where he will attend the University for another year.

Mr. Frank Williams and his mother, Mrs. M. Williams, and Mrs. E. C. Williams and daughters, Dorothy and Violet were at Wainwright on Saturday.

The Ladies Aid will meet at the home of Mrs. Nease on Thursday afternoon, October 9th at 3 P.M.

JARROW NEWS

There was a well attended meeting of the Ladies Aid at the home of Mrs. Williams, on Wednesday afternoon. Plans were made for the fowl supper and bazaar, which will be held on November 7th. Also a tea and show were arranged for Saturday, October 25th. The show to consist of donations for sale at the bazaar and everyone is invited to the tea which will be served in the church. The supper and bazaar will be in the hall. Keep this date open.

Mr. S. McGregor spent a few days this week in Edmonton.

Threshing is progressing very slowly in this district because of so much wet weather.

The Rally services held by the Sunday School on Sunday, September 23, were very enjoyable and a large crowd attended. The program as sent out by the Sunday School board was followed and special music given by the scholars. Mrs. Waite, the school superintendent led in the program. Mrs. Taylor gave the address on "Warship." Miss Doherty gave a talk on the life of Dr. Robertson. Mrs. Luxton told the story and Mrs. McCracken led in prayer. Elvin

Christenson sang very sweetly as did Margaret Taylor and Alma Marbury. Edna Peet and Veda Marbury also sang a beautiful duet. We all feel that Rally Day is a real rally in our Sunday School.

Goose shooting is quite the order of the day around here. So far only one hunter has been successful, Stan Bridgman bagging a fine bird on Monday morning.

The Junior Red Cross entertained in the school on Friday afternoon. The parents and friends of the members were invited and a short program was given and enjoyed by those present.

Mr. A. Moore, of Edmonton, has been visiting relatives in this district for the last week.

Mr. and Mrs. J. C. Curlett of Edmonton who have been visiting here for the week returned to their home on Sunday.

Miss K. McGregor who has been at her home here for the last three months has accepted a position in a store at Wainwright.

Mr. A. Kirkus spent a few days in Edmonton last week.

Pressure of business and growth of the Canadian Pacific Telegraphs has necessitated the appointment of an assistant general manager of the system. W. D. Neill, assistant manager, western lines, Winnipeg, having been promoted to the position.

Other appointments resulting from this: W. H. Thompson, superintendent, Ontario Division, Toronto, to be assistant manager, western lines, Winnipeg; H. S. Ingram, superintendent, eastern division, Montreal, to be superintendent, Ontario division, Toronto; and W. S. Emery, chief operator, Montreal, to be superintendent, eastern division, Montreal.

Fox Film Corporation during early July took sound records of the wind in the pines, the music of the waterfalls and the rippling of streams around Banff Springs Hotel and into this boxed atmosphere there will be placed actors and actresses who will be shown climbing mountains, walking by the side of lakes or canoeing on water-courses they have never seen.

Beating the world's record in passenger traffic operations, western Canada came into the limelight at the end of June with the 1252 mile continuous run from Fort William to Calgary performed by Canadian Pacific engine No. 2468, of the H1 class. This locomotive is one of several now in service and under construction for the railway and are the latest type of passenger engine.

Carrying nearly a hundred tourists organized by the University of Montreal, a special Canadian Pacific train left Montreal July 5 for western Canada and the Pacific Coast. This tour is the sixth annual transcontinental trip undertaken and will last for three weeks. The richest industrial, agricultural and commercial districts of Canada, as well as the most beautiful scenery, including the Rocky Mountains, will be visited.

With a five-pound trout taken himself and a four-pounder landed by his son in the catch, Arthur C. Melrose, Mass., has just concluded a ten-day fishing trip down the Cain's River, New Brunswick. He said he had never heard of water where there were so many trout as in Cain's River.

A total of over \$57,000,000 is to be spent this year on the construction and maintenance of roads throughout Canada. Ontario has set aside \$12,500,000 of which \$10,000,000 for new construction; Quebec will spend \$11,000,000 for extending, improving and maintaining the provincial system of roads. Manitoba will expend \$10,000,000; the Prairie Provinces, \$15,000,000, and British Columbia, \$8,500,000, resulting a total of \$57,000,000 spent by provincial governments.

The old gentleman, Father Time, often regarded as somewhat relentless, has had one put over him by the plant breeders at the Dominion Central Experimental Farm at Ottawa. Two crops of green beans are now grown there in each other, in the open and the other in greenhouses, brilliantly lighted with electric lamps, which have proved to be good substitutes for the rays of the sun.

The **JOSEPH STIMP ROSE** 2 Bobby Jones and the most enthusiastic golfer in the world is probably the Emperor of Japan, according to Walter Hagen, colorful U.S. golfer just back aboard S.S. Empress of Russia after a tour of Australia, Japan and China. Both Hagen and Kirkwood who accompanied him, voiced high appreciation of Japanese golf courses.

Major Ian Hay Beth, noted author of "The First Hundred Thousand" and many other plays and novels, arrived recently at Quebec aboard S.S. Empress of France for a four week sojourn in the Dominion where he hopes "to fish and do nothing, although I may pick up an idea for a play or something, for one is always on the look out for likely material."

"Land of Heart's Return" is the description of New Brunswick by Samuel Hecht in his Tourist Topics column in the New York American, because it "always" turned out to be nicer in reality than anybody said it was on paper."

A million dollar contract has been offered the Torbanite Products Co. Ltd. of New Glasgow, for Torbanite residue as it comes from the plant retort. This order comprises 25,000 tons at \$4 a ton and becomes effective sixty days from July 5.

Nova Scotia fisheries in 1929 had a product valued at \$11,453,491 according to a report issued by the Dominion Bureau of Statistics. Twelve of the preceding year's catch was placed at \$1294,583.

Businesses are that Canada will this year advance into second place among the gold-producing countries of the world. South Africa and the United States are second. Last year the value of gold produced in Canada was approximately \$10,000,000. This year is expected to be about \$20,000,000.

A short course for departmental work was held recently at the Agricultural College, Jarrow. Over 125 were present, including judges of ploughing, riding, standing field crops, heavy horses, harness, beef and dairy cattle and sheep and swine. Classes were started some 15 years ago, and are extremely popular. It is hoped that a uniform standard will be established for judging, at the Agricultural College.

(488)

Smashing all known records for the 120 miles of heavy going that characterized the International One Sled Derby run at Quebec recently, Emilie St. Godard captured in 40 his fourth victory in that event when he led Leonard Senneville in the time by a margin of five minutes flat in eleven hours, one minute and 27 seconds for the whole distance. St. Godard was 21 years old and a gold coin. There were twelve contestants in the race.

The western branch of the construction programme of the Canadian Pacific Railway has been housed at headquarters of the company recently, will involve an expenditure of \$11,000,000 and is C. Coleman, western vice-president, interviewed at Winnipeg. In addition to this sum, ten million dollars will be spent on improvements designed to increase the capacity and efficiency of lines operated in the west.

If you have something valuable that you don't want and somebody else can use it, an ad. in this paper will sell it for you. Try it.

Advertising Stimulates Trade

A Happy Quartette at Empire Games

It was a great day at Hamilton, Ont., when the British Empire Games were opened; a day of sunshine and smiles, as is shown by the above picture of four distinguished Canadian citizens in the vice-regal box. Whatever the smile is born of, it is unanimous. Left to right: E. W. Beatty, Chairman and President of the Canadian Pacific Railway; His Excellency Viscount Willingdon, Governor-General of Canada; Hon. R. B. Bennett, Prime Minister of the Dominion; and Hon. J. Howard Ferguson, Prime Minister of the Province of Ontario.

Canada's First Electric Tug

The first electrically-driven tug to be built in Canada was launched at Lauzon, Que., recently, when the "Prescott" Diesel-electric tug for the Canadian Pacific Car and Passenger Transfer Company's service between Prescott, Ont., and Ogdensburg, N.Y., slipped gracefully into the waters of the St. Lawrence after the traditional bottle of champagne had been broken across her bows by Mrs. Duff, wife of M. McDuff, manager of the Canadian Pacific Great Lakes Steamship Service. As a pioneer

feature in Canadian shipping, the Diesel-electric engine with which the new vessel is equipped, are of special interest to marine engineers. Each of 500 H.P., they are directly connected to twin generators, capable of delivering 330 kilowatts, each at 250 volts, when operated at 245 revolutions per minute.

In operation, a car barge with three tracks for 16 hundred-ton cars, has been loaded to the starboard counter of the tug which it will be possible to control either from its own wheel-house or from the bridge of the car barge.

PLEASURE

The tingling taste of fresh mint leaves is a real treat for your sweet tooth.

WRIGLEY'S

Affords people everywhere great comfort and long-lasting enjoyment. Nothing else gives so much benefit as so small a cost.

It is a wonderful help in work and play—keeps you cool, calm and contented.

ADD A ZEST
AFTER EVERY MEAL

WORLD HAPPENINGS BRIEFLY TOLD

Canada has twelve factories for the manufacture of asbestos and the annual production has a value of about a million and a half dollars, according to the latest figures from Ottawa.

Premier James H. Scullin, of Australia, making his first appearance before the League of Nations Assembly, denounced armaments as a menace to peace and urged the League to call a general disarmament conference.

A cable received by the Child Welfare, Inc., New York, from its administrative committee in China, said 5,000 children are dying as a result of famine and that war and communism are adding difficulty to the situation.

The committee which will administer the War Veterans' Allowance Act, was appointed by the late Federal Government, and its personnel is now preparing for the operation and administration of the act.

The superannuation of E. R. Cameron, K.C., as registrar of the Supreme Court of Canada, was announced at the Prime Minister's office at Ottawa. He is succeeded by James F. Spelle, K.C., a lawyer of Ottawa.

Portage in Prairie, Man., known for its No. 1 hard wheat, has added new laurels to its brow. On the farm of J. Prout, one mile from the town, peanuts and almonds have been produced this season. He grew two sacks of peanuts and a few handfuls of almonds.

James C. Brady, former Conservative member of parliament for Skeena, B.C., has been appointed a census commissioner of the demography branch of the Dominion Bureau of Statistics. Mr. Brady will organize the census of institutions such as hospitals, asylums, penitentiaries, and house of refuge all over Canada.

New Market in Egypt

Trial Shipment of Apples Being Made From Okanagan Valley

A new market for British Columbia apples in Egypt is being opened up by a trial shipment there, under arrangements completed by the provincial department of agriculture.

This shipment will consist of 2,000 cases from the Okanagan Valley at a price to net the growers, a profit which would be small in a domestic market but satisfactory in an export market. The agricultural department believes that Egypt will offer a large market for British Columbia fruit in the future and is anxious to cultivate this business. A few apples from this country have found their way into Egypt before, but the market has never been built up in a big way.

"My wife used to play the piano a lot, but since the children came she doesn't have time."

"Children are a comfort, aren't they?"

Mrs. M. Milner, aged 96, is still busy making cane seats at Wycombe, England.

Scenic Automobile Route

Endorse Lake Superior Route For Trans-Canada Highway Through Northern Ontario

At a meeting of representatives of the Port Arthur and Fort William city councils and chambers of commerce, held in Port Arthur, and addressed by John Long and E. A. Gibson, delegates from St. Ste. Marie, a resolution was adopted, approving of the Lake Superior route for the proposed trans-Canada highway through northern Ontario.

The meeting was unanimous and accepted the view that while the cost per mile of construction might be slightly higher, the aggregate cost, because of saving in distance, would be considerably less than for the proposed alternative routes further to the north, and felt also that it would open up a scenic route second to none on the continent.

It was further believed that with a time saving of one day over any other possible route for such tourists as would make the circuit, it would be a much greater attraction for visitors from the south.

In order to get action on the matter, the Port William Chamber of Commerce some time ago adopted resolution, approving a compromise route which would touch, Chatham and Oba, considerably to the north and adding 145 miles to the 475 miles between Port Arthur and the Soo.

Representatives present at the meeting said the Port William Chamber of Commerce would most willingly be willing to reconsider the matter and join Port Arthur and the Soo in urging the all-lake shore route.

(By Eva A. Tingey)

COLLEGE DAYS

All Tingey models are created and sketched in Paris and the patterns are made in New York.

Are you needing a cute little dress for return to class, or may be your first venture into the world of business? Here's a darling style, so fresh and chic!

"Neath the wee bolero jacket, the dress is held by simple shoulder straps.

One of the new season's closely woven jersey tweeds would be lovely for this model—the collar and cuffs are pique. Plain or spotted crepe could also be used or almost any dress weight, woven of the plain or tweed variety.

For afternoon wear, the model is charming developed in maroon, flamingo, or broadcloth, when naturally the collar and cuffs will be of finer type, perhaps lace or embroidery or contrasting silk or satin.

The belt is leather or suede.

The pattern may be obtained in sizes 14 to 20 and 34 to 40. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

School For Flin Flon

Mining Town In Northern Manitoba

Efforts of the mining town of Flin Flon to have modern public school instruction this year have at last been successful, according to word received in The Pas. Equipment is now being installed in the class rooms, and it is expected that work will begin within ten days.

Financial plans are about complete. With grants from the province, the town, and with the aid of the Hudson Bay Mining and Smelting Co., grades up to eight will be taught this year. It has been decided to engage Miss Doris M. Foster, of Winnipeg Beach, to teach the primary grades, and Miss Margaret Sutherland for grades three, four and five.

Find Early Coins

Interesting Discovery In Wales Of Gold Coins Minted In 1340

Thirty golden nobles, in perfect condition and apparently fresh from the mint where they were struck to celebrate the wedding of the French fleet by Edward III, at St. S. in 1340, were discovered recently on the edge of an ancient road leading from Tallies, Cardiganshire, to the Dovey Estuary, where a ferry in olden days carried travellers across to North Wales.

The coins depict an English warship breasting the waves and surmounted by the English coat-of-arms and the King's head.

Recipes For This Week

(By Betty Barelay)

BREAKFAST MUFFINS

- 2 cups special cake flour, sifted.
- 4 teaspoons baking powder.
- 1/2 teaspoon salt.
- 1 egg, well beaten.
- 1/2 cup milk.
- 4 tablespoons butter or other shortening, melted.

Sift flour once, measure, add baking powder and salt, and sift again. Combine egg and milk and add to flour, beating until smooth. Add shortening. Bake in greased muffin pans in hot oven (400 degrees Fahrenheit) 25 minutes. Makes 10 muffins.

BAKED FISH

- 1 average helping flleted flounder, fresh haddock or whiting.
- 2 tablespoons butter.
- Salt and pepper.
- 1 lemon.

Grease a plate and lay the fish on it with the skin side upwards. Put in the oven five minutes and the skin can be easily removed. Melt butter in a flat pan, lay fish on it and place in hot oven 400 degrees Fahrenheit, eight to ten minutes. Baste twice while baking. Remove season and squeeze lemon juice over. Serve hot.

Tour To the Orient

Business Men To Sail On Chamber Of Commerce Tour To Japan, China and India

Several business men of Edmonton and Calgary have already signified their intention of joining the Canadian Chamber of Commerce tour to the Orient, which sails from Vancouver on the "Empress of Asia" on October 16th. The tour will include a visit to Japan and reception by the Japanese Government, and trips to Shanghai, Nanking, Hong Kong and Canton, and the members will be back before Christmas. The tour is not limited to members of Chambers of Commerce and Boards of Trade, but is open to the general public as well.

In many parts of Africa there is a tree which bears large seeds resembling huge sausages.

A Shaving Lotion

When mixed with sweet oil, Minard's serves as an after shaving lotion and antiseptic. Soothes and refreshes the skin.

Wins First Prize For Layer Cake

Above is a photograph of Mrs. W. McKenzie, 9 Fernwood Park Ave., Toronto, to whom was awarded the first prize for layer cake, at the Canadian National Exhibition, Toronto. There were a large number of entries of cakes of various kinds and Mrs. McKenzie not only won first prize for her layer cake, but also for muffins and small cakes. We give below the recipe used by Mrs. McKenzie for the prize-winning cake.

Golden Layer Cake—1 1/2 cup butter; 1 cup sugar; yolks of 6 eggs; 1 cup milk; 1 1/2 cups flour; 4 teaspoonsful Magic Baking Powder; 1 teaspoonful of orange extract. Cream butter and sugar; add well beaten yolks and beat again with butter and sugar until very light. Sift flour and Magic Baking Powder together and add to first mixture alternately with milk. Beat lightly for about one minute, put into greased layer pans and bake. Temperature 400 degrees Fahrenheit. Time about 20 minutes. Put together with lemon filling and ice will hold.

Lemon Filling—1 lemon and rind; 1 cup cold water; 1 cup sugar; 1 egg; 1 tablespoonful flour. Beat lemon rind and egg together. Stir in lemon juice and sugar. Dissolve flour in water. Cook in double boiler till it thickens and spread.

Rolls Frosting—Dissolve a cup of granulated sugar in 1 1/2 cup of hot water. Wash down the sugar from the sides of the pan, cover and let boil three or four minutes, uncover and add half a cup of water. Boil till stage. Pour in a fine stream on the whites of 2 eggs, beaten dry, beating constantly meanwhile. A few Marshmallows chopped and added to the frosting gives a delicious and pleasing flavor.

Alberta Dairy Record

Last Year 95 Creameries Produced Sixteen Million Pounds Of

The dairy record of the Province of Alberta is an encouraging one. In 1912 the province had only 58 creameries producing a little over 3,000,000 pounds of butter. Last year there were 95 creameries with an output of 16,000,000 pounds. In 1912 six cheese factories produced but 40,000 pounds of cheese, while last year ten factories produced over a million pounds.

In days of yore if anybody missed stage coach he was contented to wait two or three days for the next one. Now he lets out a squawk if he misses one section of a revolving door.

Language Dying Out

Few Inhabitants On Isle Of Man Speak Manx Tongue

The language of the Isle of Man is dying. Visitors to the island this summer who hoped to hear Manx spoken on all sides, have been disappointed. The simple truth is that, out of 50,000 inhabitants of Man fewer than 1,000 have any working knowledge of their native tongue, and of this number probably no more than 100 can lay claim to be really "Manx" people—able to speak only the Manx language.

Those Manx men and women who are able to talk fluently in the language of the island are now elderly, so it is doubtful if the Manx language will successfully survive another generation.

The story of the Manx tongue is an interesting one. The language was brought to the shores of Man by Westward-roaming Celts in pre-Christian days, and it lived and flourished until the end of the eighteenth century. In 1764, for example, there were 20,000 inhabitants of the Isle of Man. And hardly any of them knew anything of English. Manxmen who left the island to join the Navy or foreign-gong ships were regarded as complete foreigners.

The Manx, indeed, were an individual nation. Their Bibles and Prayer books were printed in their native tongue, their children learned Manx in their schools. In 1840 came the last issue of the New Testament in Manx—and the decline of the Manx tongue seems to date from that year.

Towards the end of the nineteenth century—by which time there were regular and rapid steamship sailings between Man and the mainland—the number of Manxmen able to speak English had grown enormously. The number of people able to speak only Manx had disappeared to 180.

The holiday habit has been the undoing of the Manx language. Every year close on 500,000 Englishmen and Scotchmen and Irishmen holiday there. The native tongue has been unable to hold out against this invasion.

Let Boys Choose Vocation

The Farmer's Advocate says that the crusade to "Keep the Boy on the Farm" has pretty well spent itself. It was hardly to be expected that it would be a success. All boys born and raised on the farm are not partial to farm work, and some of the best men in other vocations in life in the world come from the farm. The wisest plan is to permit the boy to choose his own vocation.

Pure Bred Sire Areas

Twenty-eight rural municipalities in the Province of Saskatchewan have been established as pure-bred sire areas, which means that these areas have become entirely free of scrub sires.

Calculating machines, similar to those used for tabulating census returns, are being used in the British nautical almanac office to compute daily positions of the moon until the year 2000.

HOW ONE WOMAN LOST 47 POUNDS OF FAT

"I have been taking Kruschen Salts for nearly 3 months. I have continued taking one teaspoonful in warm water every morning. I then weighed 217 pounds, was always bothered with pains in my back and lower part of abdomen and sides.

"Now I am glad to say I am a well woman, feel much stronger, years younger and my weight is 170 pounds. I do not only feel better but I look better, so all my friends say."

"I shall never be without Kruschen Salts, will never cease taking my daily dose and more than glad to highly recommend it for the great good that it is in."

—Mrs. S. A. Solomon.
"P.S.—You may think I am exaggerating by writing such a long letter but truly I feel so indebted to you for putting out such wonderful salts that I cannot say enough."

Canned Chicken

New Business Is Likely To Develop Into Large Proportions

In his annual report recently published the Veterinary Director General of the Dominion Department of Agriculture calls attention to the increase in the number of poultry products processed under government inspection. The packing trade are canning more meats and poultry in Canada, and there appears to be room for considerable development in the field of canned chicken. Canned whole chicken made its appearance on the market last year and from the reception accorded it the new business is likely to develop into one of considerable proportions.

Strength Of Canadian Woods

A comparison of strength values of wood of sugar maple and yellow birch show that sugar maple is considerably the stronger in the green condition, whereas, after seasoning, they are of approximately the same strength. This is revealed through publication of results of the physical and mechanical properties of Canadian woods by the Forest Products Laboratories of Canada, Department of the Interior.

There is a Manchester sexton who believes accurately, as witness this entry: "Died... male, aged three months; unmarried." Which leaves no possible doubt.

Rheumatism?

Quick relief from rheumatic pains without harm:

To relieve the worst rheumatic pain is a very simple matter. Aspirin will do it every time! It's something that you can always take. Genuine Aspirin tablets are lozenges. Look for the Bayer Cross on each tablet.

When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been over-stimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid. The right way is Phillips' Milk of Magnesia—just a tasteless dose in water. It is pleasant, efficient and

harmless. It has remained the standard with physicians in the 50 years since its invention. It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

In that stuffy corner of the First National Bank! No more horrible desert when he got a raise, for fear his uncle would claim it for added board. No more stifling of natural impulses. How had he endured those years?

"I've been a slave," said Nick, pausing beneath an ancient apple tree, "but I'm a slave no longer. I can conquer the world!"

Then, because he knew he was behaving like a foolish little boy, he laughed at himself, and reaching up, picked a spray of apple blossom, breathing deeply of it.

"May!" he exclaimed. "May in New England—and I'm free! Gee! how I've longed for just this moment—longed to start out with no cares or responsibilities—without even a destination, and all my possessions in a blue bandanna! As Gay would say—"

He stopped, suddenly, at an amazing thought. He had forgotten to say good-bye to Gay! What a cad he was—especially when she was alone in the world like himself. He might send her a postcard—but no, that wasn't fair. Gay had always sympathized with his dreams and encouraged him to believe they would come true, and they had. In these last busy days of settling affairs, he had—forgotten her.

"I'm an ungrateful scoundrel," he told himself; and though it meant retracing his steps, and the risk of passing Selina Smith's back windows, he faced about for just this moment, and was rewarded by the sight of a pink-clad figure bending above some budding jonquils. Nick whistled softly, and, starting up, the girl faced him.

"You're off—so soon?"

The color that pounded in her face might have come from her usual change of attitude, or from emotion. Nick never said so, so wrapt was he in his own affairs.

"I'm off," he echoed. "Did you suppose I'd stay here mourning my dear late uncle? Don't look so shocked, Gay. I needn't pretend to you, need I, that I'm leaving?"

"I'm not shocked," the girl protested instantly, "only surprised. I've been thinking every day that you'd run—"

"My dear, I've been deep in packing," he laughed, proudly displaying his handkerchief and stick.

The girl laughed too, and said: "Where are you going?"

"Where?" Nick looked at her reproachfully. "Have you shared my plans so sparingly all these years, Gay, that you ask that question? Where indeed! To the ends of the earth!"

He threw both arms wide, as if to embrace the universe, and Gay smiled; a wistful smile that caught at something in his heart which hitherto had remained untouched.

"I wish I were a man, Nick."

He answered, his eyes devouring her sweet girlhood: "You're pretty nice as you are. I don't think I'd want you changed, Gay; and I don't believe you would change, if you could."

She sank down on the grass beside the jonquils, and, as if he had forgotten his haste to be away, Nick sat beside her, his hands clasped round his knees.

"No," she said honestly, "I wouldn't change, of course; but it must be wonderful to start off as you are starting. Nick. Do you suppose I, too, don't long to go to the ends of the earth? Do you imagine I like living here with Sadie Twichell, and sewing on other women's clothes in order to pay my board?"

"Nick looked at her, his brows drawn into a frown.

"Do you know," he admitted, "I never thought of it. It's because you're a girl. Somehow one doesn't expect a girl to go a-gypsying, though why she shouldn't—Gay," he broke off suddenly, "what pigs men are!"

She laughed. "One would hardly call you that, Nick, after the way you stuck by your Aunt Nettie."

"But I am," said Nick, still frowning. "I came to say good-bye to you," (his honesty made him want to re-

veal the fact that in selfishness he had almost forgotten the farewell, but his kind heart forbade the disclosure that he knew would hurt her), "I came to say good-bye," never thinking that you, too, might long to do what I am doing. I'm ashamed of myself, Gay. What must you think of me?"

"I think," she said, meeting his eyes soberly, "that you're getting just what you deserve—a good time. What do you think of me, to imagine for a moment that I don't rejoice with you? Nick, you're only a boy, and you've never had much fun. Why shouldn't you be a little thoughtless? I—I believe I'm glad you are!"

He stirred a bit uneasily, while Gay added with an understanding smile, "I mustn't keep you. I know you're chafing at the bit."

She arose, leaning down to brush an imaginary something from her skirt; and as he got to his feet she stretched out a friendly hand.

"Good-bye, Nick. The best of luck to you."

He took her hand, squeezed it hard, and lifting the stick and bundle, said, with a gaiety that was a little forced, "Well, I'm off. I'll drop you a postcard from California, or Alaska, or Timbuctoo, or wherever I happen to land. Good-bye, old friend."

He found it unaccountably difficult to meet her eyes, so didn't meet them. But he got away. He got as far as the stone wall that divided Miss Sadie's land from Selina Smith's.

Then he turned, though even as he did so something warned him that it was dangerous to look back. He turned, and his hand raised in a full salute.

Gay was standing just where he had left her, but it seemed to Nick that all the buoyancy of youth had dropped from her. She was leaning against the gnarled trunk of an old apple tree, with the jonquils at her feet and the pink, sweet blossoms all about. In her pink gown she should have looked the embodiment of spring; but in reality she dropped, like a flower plucked by some ruthless hand and left to die. Nick couldn't bear it. He tossed his stick and bundle, emblems of freedom, to the ground; and strode back; while Gay, pulling herself together, ran to meet him.

"Did you forget something?"

"Yes," said Nick. "I forgot the best thing I could ever have had. Gay, listen. You'll think me crazy, but why don't you come along?"

"With you?"

"Her eyes widened at the amazing proposition."

"Why not? It would be bully. I'm sure."

Fortunately for Gay there was a rustic bench behind her. She sank down breathlessly, while Nick, with a cautious glance at the hedge that hid them from Selina Smith, took the place beside her.

"We could have the time of our lives," he urged. "I've always done things alone, but with you along—"

Gay found her tongue.

"I believe you are crazy," she said sternly. "What would people think? They'd say—"

"Oh, Lord, Nick interrupted, with a characteristic grin, "I'm not a capitalist, that's what we'd get married first."

"Get married!"

He laughed at her amazement. "Why not? It's been done before. We're both of age, you know. Why shouldn't we?"

"But you don't love me."

"Nonsense! I love you a lot. Always have. Of course, if I'd bore you."

MAGIC BAKING POWDER

never varies

Its uniform leavening qualities give the same satisfactory results with every baking. 3 out of every 4 Canadian housewives, who bake at home, say they use it because it does give consistent, better baking results.

If you bake at home, the New Magic Cook Book will furnish you with dozens of attractive baking suggestions.

Try This Recipe for Muffins

1 tablespoon butter
2 tablespoons sugar
2 eggs
2 cups flour
Cream butter and sugar. Add eggs one by one, beat well. Sift dry ingredients together and add to first mixture alternately with milk. If batter not stiff enough, add a little more flour. Put in well-greased muffin pans and bake for 20 minutes in a quick oven.

*This fact was revealed in a recent Dominion-wide investigation.

Ancient Warship Discovered

Hull Armed With Heavy Iron Guns Found in Stockholm Canal

The hull of a 500-year-old Swedish warship, armed with heavy iron guns, recently discovered on the bottom of the Riddarholms Canal, in the heart of Stockholm, has been pumped dry.

Archaeologists who have examined the relic believe it to be the oldest war vessel from the medieval period hitherto discovered. It is built of oak, low and slender in type, and seems to be a direct descendant of the Viking ships, which were among the swiftest and most seaworthy boats ever constructed.

Closely by the ancient guns have been found round cannon balls of stone, lead and iron, and some iron powder chambers for the breech-loading guns of that period. Several cone-shaped pieces of hollow wood also have been brought to light, partly loaded with small pieces of flint and stone, which may have been primitive case-shot projectiles for close range firing. Below the deck, which is partly broken down, other interesting objects belonging to the equipment of the ship have been found.

The work of recovering the vessel is very difficult, but the hull itself is so well preserved that it may be possible to reconstruct the ship with its armament and rigging fairly complete.

Is Fond Of Music

Ramsay MacDonald Listens In On Radio Broadcast Programs

Ramsay MacDonald, Prime Minister of Britain, is a great lover of music.

Speaking at the jubilee of the Guildhall School of Music in London, England, Mr. MacDonald said he had enjoyed many Sunday afternoon listening to the broadcast of Bach's church cantatas from the school.

"I confess that whether I am at home in my quiet peaceful house in Hampstead or down at Chequers," the Prime Minister's official residence, he continued, "I make it a rule to issue an order—and I am not given to that very much—that there shall be no engagements, no interference, no business, but that my friends and I shall retire to a quiet corner and spend a very inspiring, comfortable, and peaceful half-hour listening to the broadcasts."

Persian Balm—the ideal toilet requisite for every discerning woman. Perfect in results. Creates complexions of rare beauty and charm. Delightfully cool and refreshing. Never leaves a vestige of stickiness. A velvety smooth lotion toning and stimulating the skin. Making it truly rose-scented in texture. All saintly women invariably choose Persian Balm. It imparts that subtle distinction so characteristic of the elegant woman.

New Folder Of Canada

"Canada" is the title of a new folder that has been issued by the Department of the Interior at Ottawa, which contains a concise summary of the country's natural resources, their potentialities and development. The folder also presents a very interesting map indicating natural resources and industrial areas in southern Canada, in addition to illustrations depicting commercial activity in the various provinces. A copy can be obtained from the National Development Bureau, Department of the Interior, Ottawa, Canada.

Nearly 1,400 automobiles a month are being imported into Sweden.

Russian export trade in chemicals is very active.

After Thirty-Three Years

Bodies Of Arctic Explorers In Excellent State Of Preservation

The bodies of Salomon August Andree and his two companions, according to the dispatches, were in an excellent state of preservation when they were found on White Island in the Arctic Sea, although it has been thirty-three years since they disappeared. This curious phenomenon of earth in the frigid parts of the earth, to preserve for years the appearance of life even in death, has made its impression on the human imagination long before now.

We recall a short story many years ago about a couple who went to the Alps on their honeymoon. The man fell into a crevasse and the guides were unable to recover his body. The girl, frantic with grief, consulted scientists as to what she could do. They told her that the glacier moved a few inches a month; at the end of fifty years, perhaps, it would move far enough to make possible penetration of the crevasse. So for fifty years she waited. And at the end of that time the body was recovered. They told her that the glacier moved a few inches a month; at the end of fifty years, perhaps, it would move far enough to make possible penetration of the crevasse. So for fifty years she waited. And at the end of that time the body was recovered.

The work of recovering the man, was permitted to look at the body of her husband. It was perfectly preserved, and she saw the handsome boy she had married fifty years before.

The Third Emigration

Russia Worried Over People Who Will Not Come Back

The Russian Government is considerably worried over what has been designated as the "third emigration." The first emigration was that of the Socialists and anarchists in czarist days. The second was that of the one or two million Russians who fled to all parts of the world from the Bolshevik terror. The third is that of the "nonreturners," soviet citizens appointed to diplomatic or other posts abroad who refuse to go back home when so ordered. The penalty for such refusal is death and confiscation of goods.

The third emigration is a striking indication of the conditions of tyranny prevailing in Soviet Russia. When government officials, presumably selected for their special zeal in the cause, desert the ship of state in considerable numbers there is reason to believe that the soviet system ought to be confined to Russia.

No Room For Argument

At an exhibition of paintings, recalls Sir John Ross, former Lord High Chancellor of Ireland (in his reminiscences, "Pilgrim's Scrip"), this conversation was overheard between two women who were looking at a picture, "The Dance of Salome": "Now, what's that, Maria?" asked one.

Maria (glancing at catalogue): "Solomon dancing for Herod."

"But he never danced it, Maria!" Maria (tartly): "He musta done, else he couldn'ta been photographed."

Has Warm Job

H. B. Stevens, chef of the Royal Scot express, has spent 20 years of his life in a space of eight yards long by two and one-half yards wide, with a temperature that is mostly around 130 degrees. His train kitchen is an ingenious affair. The whole of one side is taken up by stoves and tanks, and the other by collapsible tables on which food is prepared. Stevens and an assistant prepare meals for 200 in this tiny kitchen.

Minard's Liniment for Chest Congestion.

Little Helps For This Week

"Blessed are they that keep my ways."—Proverbs viii, 32.

And oh! in my exceeding weakness, Make Thy strength perfect; Thou art strong; Aid me to do Thy will with meekness, Thou, to whom all my powers belong.

If thou wilt but go on with thy duties, desiring to love—in such cases the desire of loving is love in His sight.—The irksome dullness and dryness is the thorn; in thy flesh, the messenger of Satan to buffet thee. But fear not; God's grace is sufficient for thee; His strength will be made perfect in thy weakness. Only set yourself in earnest to obey His voice. Say to Him, night and day, "Behold the servant of the Lord!" be unto me according to Thy word."

—John Keble.

The Poor Man's Friend.—Put up in small bottles that are easily portable and sold for a very small sum. Dr. Thomas' Electric Oil possesses power in concentrated form. Its cheapness and the varied uses to which it can be put make it the poor man's friend. No dealer's stock is complete without it.

Feed Skin Milk

Feeding tests at the Cap Rouge Experimental Station of the Dominion Department of Agriculture show that it pays to feed laying hens skin-milk. Five years tests show that with a basal ration of grain meal, shell and vegetable feeds, hens fed skin-milk laid more eggs and gained more in weight than hens fed beef scraps. Incidentally the cost of skin-milk is just one-ninth that of beef scrap.

Athletes recommend Minard's Liniment.

"He—If your father catches me sleeping tonight I wonder what he'll say to you mother?"

She—"He'll probably say 'Sh-h-h'!"

There are almost 600 different kinds of parrots.

Daughter Is Stronger Now

"My daughter Catherine is fifteen years old. She was very irregular, often sick at her stomach and had to stay in bed two or three days at a time. One of your booklets was sent to us by mail so I got her a bottle of Vegetable Compound. Catherine has been taking it regularly and she is gaining in weight and every day. I told the neighbors and four other girls are taking it with good results."—Mrs. Clarence Jenkins, Box 14, Thorlo, Ontario.

for ANY CHILD

WE can never be sure just what makes a child restless, but the remedy can always be the same. Good old Castoria! There's comfort in every drop of this pure vegetable preparation, and not the slightest harm in its frequent use. As often as your child has a fretful spell, is feverish, or cries and can't sleep, let Castoria soothe and quiet him. Sometimes it's a touch of colic. Sometimes constipation. Or diarrhea—a condition that should always be checked without delay. Just keep Castoria handy, and give it promptly. Relief will follow very promptly; if it doesn't, you should call a physician.

PREVENTING DIPHTHERIA

Diphtheria belongs to a group of communicable diseases as it is caused by a disease germ. It is a severe and frequently fatal disease, and its most dangerous attacks are made upon children from six months to five years of age.

The germ which causes diphtheria lodges in the throat and nose. When the person harboring such germs coughs or sneezes or simply talks, he throws out little drops of secretions in which the germs are present in large numbers.

In order to convince yourselves that this happens, we would suggest that you stand in front of a clean mirror, and that you cough, sneeze or talk at the mirror. You will find that you throw out quite a spray of droplets, and as you gradually increase your distance from the mirror, you will discover also that an uncovered cough or sneeze sends these droplets a distance of several feet.

This then is the reason why you should always cover your nose and mouth with a handkerchief when you cough or sneeze. You can at least turn your face to the floor if the sneeze comes unexpectedly. You will also understand why you should not talk directly into a person's face or allow him to do the same to you.

These points have been mentioned because they show how, in our daily lives, we are almost sure to be exposed to disease germs. It follows that as we are frequently exposed to disease germs, we should, as far as it is possible, keep ourselves in such condition that we will be enabled to deal with any germs which may gain entrance into our bodies.

Diphtheria is one of the few diseases which we can prevent. The deaths suffering and damage for which diphtheria is responsible each year can be prevented. This waste of human life, this injury to health need not occur because it is in our power to protect children against diphtheria.

By the injection of diphtheria toxoid which is a harmless substance, the body of a child develops certain protective forces. When these protective forces are present in the body, then diphtheria germs are powerless to do any harm to that person.

Every child has the right to be healthy and to be protected from disease. We have the means to protect children from diphtheria. The question for each parent to ask is: What about my child? If all persons had their own children immunized against diphtheria, the disease would be completely wiped out.

Questions concerning health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

RUST RESISTANT WHEAT

Regina, October, 1st.—In a technical and practical way experts of both the Dominion and Provincial depart-

ments of agriculture have been constantly to the fore in an endeavor to solve the many problems with which the farmer must contend in the production of crops. The farmer himself has rendered valuable assistance and the fight against the ravages of weeds, parasites, drought, etc. still continues. During recent years much experimenting has been done towards the objective of securing wheat capable of successfully resisting the ravages of rust. Some real progress has been made and in some cases claims have been made that have not stood the test of investigation over a period. Some of the experimenters themselves have been disappointed after the growing tests of repeated seasons. The work is still progressing however, and much hope is entertained that complete success will ultimately follow. As a result of these activities there is an added interest to the report from Yorkton, Saskatchewan, of the experiments carried on by a farmer of this district who in 1928 secured an ounce of wheat reputed at that time to be rust resistant. This small sample was sown that year, and the yield amounted to a pound and a quarter. The yield amounted to one and a quarter bushels. This year the yield will reach approximately 30 bushels. The important feature of the report however is that "while the crops on both sides show evidence of damage from rust, this experimental plot does not."

The originator of the sample sown, a man of considerable technical and practical experience, claims it to be practically immune from black stem and lead rust, highly resistant to bunt or stinking and leaf smut and highly resistant to leaf scab and root rot. Whether or not these claims will bear up under the tests and conditions of the future, whether or not these claims will be scattered to the four winds of differences of climatic conditions or for some other cause, the future alone can tell. One thing certain the ravages of rust and smut take an enormous toll from the producers of grain every season and the best brains of experts are struggling with the problem. These conditions exist not only in Canada but in many other countries as well and it is hoped that the conference part of the programme of the World's Grain Exhibition and Conference to be held at Regina, Canada, in 1932 will be the medium through which the most varied experiences and the best thought of the most active experimenters and technical experts the world over, not only upon this matter but upon other matters as well, may be gathered together, discussed, dissected, and finally consolidated and given to growers of grain and seed in a form best suited to their needs for the improvement of crop production in all its phases. This is the thought behind the origin of this great undertaking for 1932 and evidences are ample to indicate that it merits the support of every citizen.

INTERESTING SPECULATION

The policy with regard to farming in the future is a subject in which we are all interested. Here is an interesting statement recently published on the editorial page of The Calgary Albertan in this connection. "It does not seem long ago since the homesteaders were filling on their 160 acre quarter sections quite satisfied that this was as much as a farmer could be expected to cultivate. Then the theory became current that a quarter section was not enough for successful farming and the Department of the Interior put the pre-emption on the 'market' and the homesteader was able to take up 320 acres of land instead of 160. But the Ontario coming West cited their little strips of land, maintaining that as good a living could be made of 40 intensively cultivated acres as of even a quarter section of scattered crops on the prairies and predicted that the day of the 40-acre farm would come in the West. Now it appears that the prophecy like many another is going to prove the very reverse of the truth.

"Farming is entering the ranks of big business. The acres cultivated by individual farmers tend to be more rather than less and the day of the 'wheat factory' on a gigantic scale is already seen by some. The average size of the Western farm in 1926 was 370.5 acres in Alberta, 389.7 in Saskatchewan and 270.6 in Manitoba. This illustrates the tendency to expand for 1904 the average acreage was 288.6 in Alberta, 285.1 in Saskatchewan and 274.2 in Manitoba. This section of next year's census will be interesting as disclosing whether the tendency is still toward larger farms.

"That the western farm should be larger was the view of Mr. E. W. Beatty, chairman and president of the Canadian Pacific Railway, expressed in Regina a few days ago. A conference of agricultural economists also in Regina had only a few days before that reached the conclusion that farming of tomorrow will be a thing not of mere sections but of 100, 200-acre tracts made not only possible but in some measure necessary by the extensive use of machinery in all farming operations.

"The farm of tomorrow, in other words, will be something of a factory and agriculture a manufacturing enterprise. The half-section farmer will then be reduced to the status of a vacant lot market gardener, soon to be absorbed into the large corporation. The future of Western farming, then, becomes an interesting subject of conjecture."

THE HONEY CROP

Honey production in Canada despite a lowering price average shows a big increase in both volume and value. Much of this increase has been due to the help provided apiarists through the research work of the Bee division of the Dominion Department of Agriculture. In 1927 the nine provinces produced a total of 23,196,493 pounds of honey, which, selling at an average price of thirteen cents a pound was worth \$3,998,588. In 1929 the production amounted to 30,978,735 pounds. This sold at an average price of eleven cents a pound, giving a crop value of \$3,407,837. Ontario is the largest single producer of honey, the 1929 amounting to \$7,000,000 pounds, while Prince Edward Island produced only 14,060 pounds.

Main Street

Recall One Cent Sale coming to Irma. Watch for further particulars. BORN.—To Mr. and Mrs. J. Glover, of Fabyan, at the Wainwright municipal hospital on September 30th a girl. Coming to Irma Drug Store, the New Improved Victor Radio. Consult us before you buy.

Mr. Shepherd formerly of the Irma Bank was a visitor in town Sunday. Mr. and Mrs. Shaw are spending a few days in the city.

Mrs. Soniff returned last week after spending two weeks at Vimy, Alta.

Miss Pearl Dinisay returned on Wednesday after spending her vacation at Bruce and surrounding towns.

Mr. John Sawdon is here looking after the harvesting of the crop on his farm.

Lawrence Aykroyd and nephew James have been spending a few days in Edmonton.

Stella Arnold returned to school on Wednesday after spending some time at home with a broken arm.

Mr. A. White returned to Irma after spending some time in the city.

Mr. and Mrs. Hipperson left by motor on Monday for Vermilion and from there they intend motoring to Edmonton.

Miss Mary Wozny of Vilma arrived on Tuesday to attend school and is residing with her sister, Mrs. C. Soniff.

Miss Beulah Blade has returned to High School where she will resume her studies.

Mr. Cecil Askin of Oakland, California arrived last Friday to visit his parents and friends. He has been living in Oakland for the past ten years.

The regular meeting of the Ladies Aid was held last Thursday at the home of Mrs. James Fenton, a good number turned out, 17 members and several visitors.

A good deal of business was transacted. Plans were made for the tea and shower to be held at the Mansie on October 11th. The buying committee for the Bazaar reported on what work was out and took orders for more material. The date, November 1st being set for the Bazaar.

The Play committee reported having arranged for books for the play which they hope to have ready some time in late of November. Watch for further date.

The opening meeting of the Mohawk Trail Rangers Camp was held in the basement of the United Church September 29th. The following officers were elected:

Chief Ranger—Robert McGuire.
Sub. Chief Ranger—Ralph Schonert.
Tally—Charles De Tro.
Cache—Ray Locke.

All boys, ages 12, 13 and 14 are cordially invited to join.—W. A. Gamble, Mentor.

UNFAIR REFLECTION ON CANADIAN PRESS

The prime minister has impugned the press of Canada as an inaccurate and, in instances which he did not specify, deliberate in misrepresentation. The premier is wrong in his estimate and unwise in his reflection upon the press, an honorable institution.

Mr. Bennett has characterized the Calgary newspaper reports of his address in this city as nonsense. He would, by employing trained verbatim shorthand writers, independent of his staff, reported Mr. Bennett exactly as he spoke. The Herald will be quite prepared to sustain before the public its report on anything Mr. Bennett said.

The prime minister appears to think that speaking over the radio is more satisfactory to politicians than newspaper reports of what was stated. The fact is that a newspaper report, if honestly written, as practically all newspaper reports are written on either side of politics, is a written record, while the radio talk vanishes into the ether, leaving no direct responsibility.

The Herald does not trouble on its own behalf to debate with the prime minister the accuracy of its report of anything he may have said within the radius of its influence, but it does object to what it regards as an unfair reflection upon the press of Canada, which as a whole has conducted controversial politics on a fairer basis than the politicians.—Calgary Herald.
